***ALL CLEAR* BOIL WATER ALERT – SELECT AREA AROUND S. CLINTON/M-100 STREET IN GRAND LEDGE**

GRAND LEDGE, MI, May 22, 2019, [4:45 PM] –

The City of Grand Ledge issued a boil water advisory on Monday, May 20, 2019 for a select area around S. Clinton/M-100 in Grand Ledge. The City conducted required Department of Environmental, Great Lakes & Energy (EGLE), formally known as the Michigan Department of Environmental Quality (MDEQ) certified laboratory tests to ensure water meets State of Michigan standards. Two consecutive water sampling tests were completed; 24 hours and 48 hours after water pressure was restored. **The tests results from the State of Michigan indicate that the water is safe for use and effective immediately the boil water advisory has been lifted.**

**BOIL WATER ALERT
LIFTED**

MAY 22, 2019 -
The Boil Water Alert for the select area around S. Clinton Street/M-100 has been **LIFTED!**

Please refer to CityofGrandLedge.com for more information.

All Clear Affected Boil Water Alert Area

The City of Grand Ledge

What should I do now in my home or business?

Construction activity may have been disturbed sediments that have naturally accumulated in water mains, service lines, and your home plumbing. Residents and businesses in the identified area are advised to flush their plumbing to remove any such debris and to check faucet aerators where those particles may be captured.

When I turn on the faucet, the water sputters. Why?

You may have air in the plumbing lines. Turn your tap on slowly and run the water until the sputtering stops.

The water is discolored. What should I do?

Flush your lines by running water until the discoloration has cleared. The water is safe, and discoloration is caused by naturally occurring sediment that may have been disrupted.

Why does my water have a strong smell?

The smell is most likely chlorine. Often, water systems will increase chlorine levels to disinfect the pipes in home plumbing.

Do I need to clean out my faucets?

Yes. You should flush your faucets after the boil water advisory.

My refrigerator has a water dispenser/ice maker. Do I need to clean them?

Yes. Water dispensers and ice makers are connected to your water line. You need to flush and clean them. Follow the directions in the owner's manual.

Do I need to do something for the water softener?

Yes. You may need to run through a regeneration cycle. Follow the directions on the owner's manual.
