- Realistic "Sandstone" climbing rock

The sandstone boulder offers graduated challenges for children ages 5-12 as they ascend to a height of 5 feet. The molded detail gives the boulder a truly organic feel that will complement naturalized play spaces. The surface and coloring of the rock mimics the historic 80' sandstone ledges cliffs for which Grand Ledge is named.

- Activity meters with adaptive switch capability

The Activity Meter can be used as a stand-alone meter and also features a port for an adaptive switch so children with limited mobility can actively engage.

- Swizzler spinner and Orbit spinner (surface level merry-go-round)

Swizzler creatively unites the swiveling action of a spinner with a circular rocking motion that is unlike any other playground component. Users will experience a self-driven, gentle rocking motion with each playful rotation, either on their own, or propelled by friends.

Designed to accommodate children of all abilities, this ground-level spinner creates a space where inclusivity meets fun. The spacious platform is wheelchair accessible, ensuring that every child can participate in the excitement, while the smooth, rotating motion offers a sensory-rich and engaging experience.

- ADA poured rubber surfaces and artificial turf surfaces inside the playground

5' ADA sidewalks encase the entire playground, providing easy accessibility and a safe area for children to instinctively be corralled.
